Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 1-23-2004 has been considered by the examiner.

Drawings

2. The drawings filed 1-23-2004 are approved by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, 6-8, and 12-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Endo et al. (5,894,318). Endo et al. teaches a method of using a printing device comprising receiving a laminate request via the user interface, adjusting the fusing temperature and speed, laminating a document surrounded by laminate sheet material. The document and laminate sheet materials are inserted through the manual feed tray.
5. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kikuchi et al. (JP 06-11980a). Kikuchi et al. teaches adjusting the pressure when laminating a document with laminating material (abstract).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2852

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Endo et al. in view of Fukushima. Endo et al. does not teach displaying instructions on the display device.

Fukushima teaches displaying manual feed instruction on the device display and instructions on how to operate the other features of the printing device. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teaching of Fukushima with the printing device of Endo et al. to provide instructions are needed for operating the printing device.

Allowable Subject Matter

9. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2852

Prior Art

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Endo et al. (5,878,303), Forest et al., Nanos, Endo (JP10-10933a), Hibino et al., Imai, and Ueda et al. teach pertinent prior art.
